MOUNTING & USAGE

1. For the small contact in 0.8-2.5mm, electrical iron power shall not be overlarge the range of 25W-35W as the connector is welded and the time shall be controlled between 2 sec and 3 sec.
2. Thermal shrinkable sleeve must be used at weld joint for insulation.
3. When connector with cable clamp (P), the clamp shall be adjusted to proper tightness.
4. Fixed circular connector(Y). The hole should be cut in straight edge on the top as following drawing (a) shows, when drilling on panel, and C<D0.5mm.
5. As operating voltage is larger than 50V(AC vital value), shell shall be grounded as figure (b,c)below.
